

DHRUV KINGER

Senior Full-Stack Engineer (.NET & Angular) | 3x Azure Certified

New Delhi, India • dhruvkinger@gmail.com • linkedin.com/in/dhruv-kinger • github.com/DhruvKinger

PROFESSIONAL SUMMARY

Innovative and results-driven Senior Full-Stack Engineer with nearly 6 years of experience specializing in the .NET ecosystem, Angular frontend architectures, and Microsoft Azure cloud technologies. Passionate systems architect and developer who blends deep theoretical knowledge with robust hands-on application. Proven expertise in building distributed enterprise systems, securing identity flows, refactoring legacy codebases, and deploying scalable cloud solutions aligned with strategic organizational objectives.

AREAS OF EXPERTISE

Backend Development: C#, .NET Core, ASP.NET Core, Web API, ADO.NET, Entity Framework

Cloud & Security: Azure SQL, App Service, Key Vault, Storage Account, Azure B2C

Frontend Development: Angular, TypeScript, JavaScript, HTML5, CSS3, jQuery, Dialogflow

DevOps & Databases: Azure DevOps CI/CD, TFS, Intel Edge AI, SQL Server

PROFESSIONAL EXPERIENCE

ThrivePass – Senior Software Engineer / Software Engineer

Jun 2022 – Present

- Architected and delivered core full-stack features across 3 complex SaaS products utilizing .NET backends and Angular frontends to offer employee wellness and health benefits to enterprise-level clients.
- Executed the complete responsive frontend redesign of major product portals in Angular, working directly with backend APIs to drive seamless client portal experiences.
- Configured and managed centralized Azure AD B2C authentication structures, establishing common, secure sign-in flows across all organization-wide projects.
- Deployed, hosted, and monitored critical services using Azure App Service and Azure SQL Database while strictly protecting credentials and connection strings within Azure Key Vault.
- Utilized Azure Storage Accounts for scalable blob processing and developed custom automation scripts to manage persistent cloud storage resources efficiently.

Aplos Global Ltd – Software Engineer

Sep 2020 – May 2022

- Designed, built, and maintained mission-critical modules (Attendance, Leave, Overtime processing, Bonus calculations, Income Tax structures, Visitor Verification, and packing pipelines) within the company's core ERP software.
- Developed robust C# console utility applications executing 24/7 via Windows Task Scheduler to capture, process, and synchronize massive attendance streams with databases.
- Built a responsive, cross-platform mobile application extending a comprehensive 360-degree interactive view of the ERP module to end-users on the go.
- Successfully drove transition strategies to migrate legacy Team Foundation Server (TFS) repositories over to Azure DevOps, engineering modern CI/CD pipelines to fully automate deployment.

Solitaire Infosys Inc – Summer Intern

May 2019 – Jul 2019

- Gained valuable industry exposure collaborating alongside experienced engineering and development teams.
- Applied backend development fundamentals to successfully build, test, and deliver scheduled project milestones on time.

SELECTED PUBLICATIONS & ACADEMIC RESEARCH

"Enterprise Application with Microsoft Cognitive Services Hosted in Azure" – *Co-Author, TEST Engineering & Management*

Published research highlighting how enterprise architectures scale and incorporate NLP/intelligence layers natively via Microsoft Azure hosting structures.

"Connecting Microsoft Azure Database with .NET Application" – *C# Corner*

A highly-rated technical guide outlining standard practices for shifting local relational storage architectures to Azure SQL Database instances and securing configuration variables in production .NET code.

KEY PROJECTS

Mobile Application for aPOP (Associated with Aplos Global Ltd)

Engineered a comprehensive cross-platform mobile app using Xamarin.Forms that serves as a 360-degree operational hub. Built vital industrial modules ranging from mobile attendance validation to live barcode scanning on packaging cartons and integrated real-time leave management workflows.

Social Media Sentiment Pipeline (Azure & Cognitive Services)

Designed an automated Azure Logic App workflow integrating cognitive NLP endpoints to extract, analyze, and catalog sentiment patterns from stream-based external feeds.

EDUCATION & CREDENTIALS

Bachelor of Engineering in Computer Science

Chandigarh University, Punjab, India

Certifications:

3x Microsoft Azure Certified • MCT
